SUMMARY

Cloud-focused Application Manager with 4+ years supporting production SaaS platforms across AWS environments. Experience includes onboarding enterprise client environments, implementing secure S3-based data ingestion workflows, automating operational tasks, and troubleshooting application and integration failures through log analysis and system diagnostics. Routinely leverage AI-assisted tooling to accelerate scripting, diagnostics, and operational automation tasks while maintaining production reliability and system integrity.

CORE SKILLS

AWS · Linux · Windows · Bash · Python · Git · SQL · Log Analysis · ERP Integration · Environment Provisioning Support · Onboarding Automation · CI/CD Exposure · Platform Operations Support · Operational Automation (AI-Assisted)

EXPERIENCE

epaCUBE — Application Manager / Software Developer

2022 – Present

- Support and maintain a production SaaS profit-optimization platform utilized by enterprise clients.
- Implement time-limited S3 presigned URL workflows to support secure external client data ingestion.
- Configure object-level access for onboarding workflows without exposing long-lived AWS credentials.
- Troubleshoot application, connector, and ERP data integration failures through log analysis and system diagnostics.
- Build and maintain ERP data pipelines using CloverETL and SQL.
- Author Bash and batch scripts to automate recurring operational and onboarding tasks.
- Leverage AI-assisted tooling to generate and refine automation scripts used in onboarding and troubleshooting workflows.
- Support new client onboarding processes through environment setup and configuration.
- Assist with platform-level troubleshooting across Windows and Linux-based runtime environments.
- Maintain integration connectors between enterprise ERP systems and cloud-hosted application services.

SpinSpire — Software Developer (Mentorship Program)

2021 – 2022

- Developed application features using JavaScript, React, HTML, and CSS.
- Integrated third-party APIs within application workflows.
- Participated in debugging, testing, and Git-based code review processes.

EDUCATION

Bachelor of Fine Arts — Florida Atlantic University
